ONUR BAYIRLI

Full Stack Web Developer

ABOUT ME

I was born in 2000 in Hatay, Turkey. My interest in computers started when I was 6. I always wondered how computers, websites, apps, games and other technologies developed. I understood that the logic behind all of them was coding. Finally, I started to learn how to develop web applications. I'm also interested in cyber security and ethical hacking. As a result of my interest, I improved myself in web development and cyber security in a relatively short period of time. For more than 2 years, I've been engaged in web developing (especially backend), software engineering, cyber security and ethical hacking. I've developed many websites to realize my potential. It is an endless pleasure for me. I plan on continuing to learn new things in this industry.

CERTIFICATIONS

- Python | given by Istanbul Internet Institute
- HTML5 and CSS3 | given by Istanbul Internet Institute
- Python (basic) | given by Hackerrank
